# 1. EXECUTIVE SUMMARY

Forex trading is one a huge market that has been transformed by the internet over the past three decades. Centralized exchanges have a number of flaws. Over \$1 billion worth of crypto assets have been hacked & stolen from centralized exchanges in 2018 alone.

Some of the notable benefits include: affiliate program, anonymity of transfers, operation in 24/7 system, investments in digital currencies, irreversibility of the transactions, the deflationary nature of the digital currency, and decentralization & the speed of currency transfers.

Hitmex Exchange is going to introduce our own token on Hitmex Exchange with the name BMEX. We are going to do IEO (initial exchange offering) for BMEX on our exchange too. This is not just another cryptocurrency exchange because we have got a unique business model.

HITMEX is the world class blockchain asset exchange with super high performance order matching engine. It is a next generation crypto asset trading platform which aims to support highly leverage and support assets swap of up to \$1,000,000 USD per transaction.

This white paper sheds light on Hitmex Exchange and its BMEX Token that is going to be launched in very soon. Continue reading to know why you should invest in this profitable exchange and token.

## 2. FLAWS IN CENTRALIZED EXCHANGES

There are a number of issues centralized and decentralized exchanges have at the moment. The future belongs to decentralized exchanges that are able to solve those flaws.

Forex trading is one a huge market that has been transformed by the internet over the past three decades. Centralized exchanges have a number of flaws.

There are many security flaws, hacks, and scams that have plagued the crypto-sphere for the past decade, and unfortunately, there have already been a few high profile incidents 2018

Centralized wallets are increasingly large honeypots. Millions of people could lose not just their identity and data handed over to centralized exchanges, but their money as well.

Over \$1 billion worth of crypto assets have been hacked & stolen from centralized exchanges in 2018 alone. Lack of security safeguards and regulatory oversight

There is a lack of diversified crypto investment products. Rampant greed is risky and harmful for the investors. There are many other flaws that discourage investors.
